tutorial

membikin 2 user admin dan 3 user
standard

sudah?

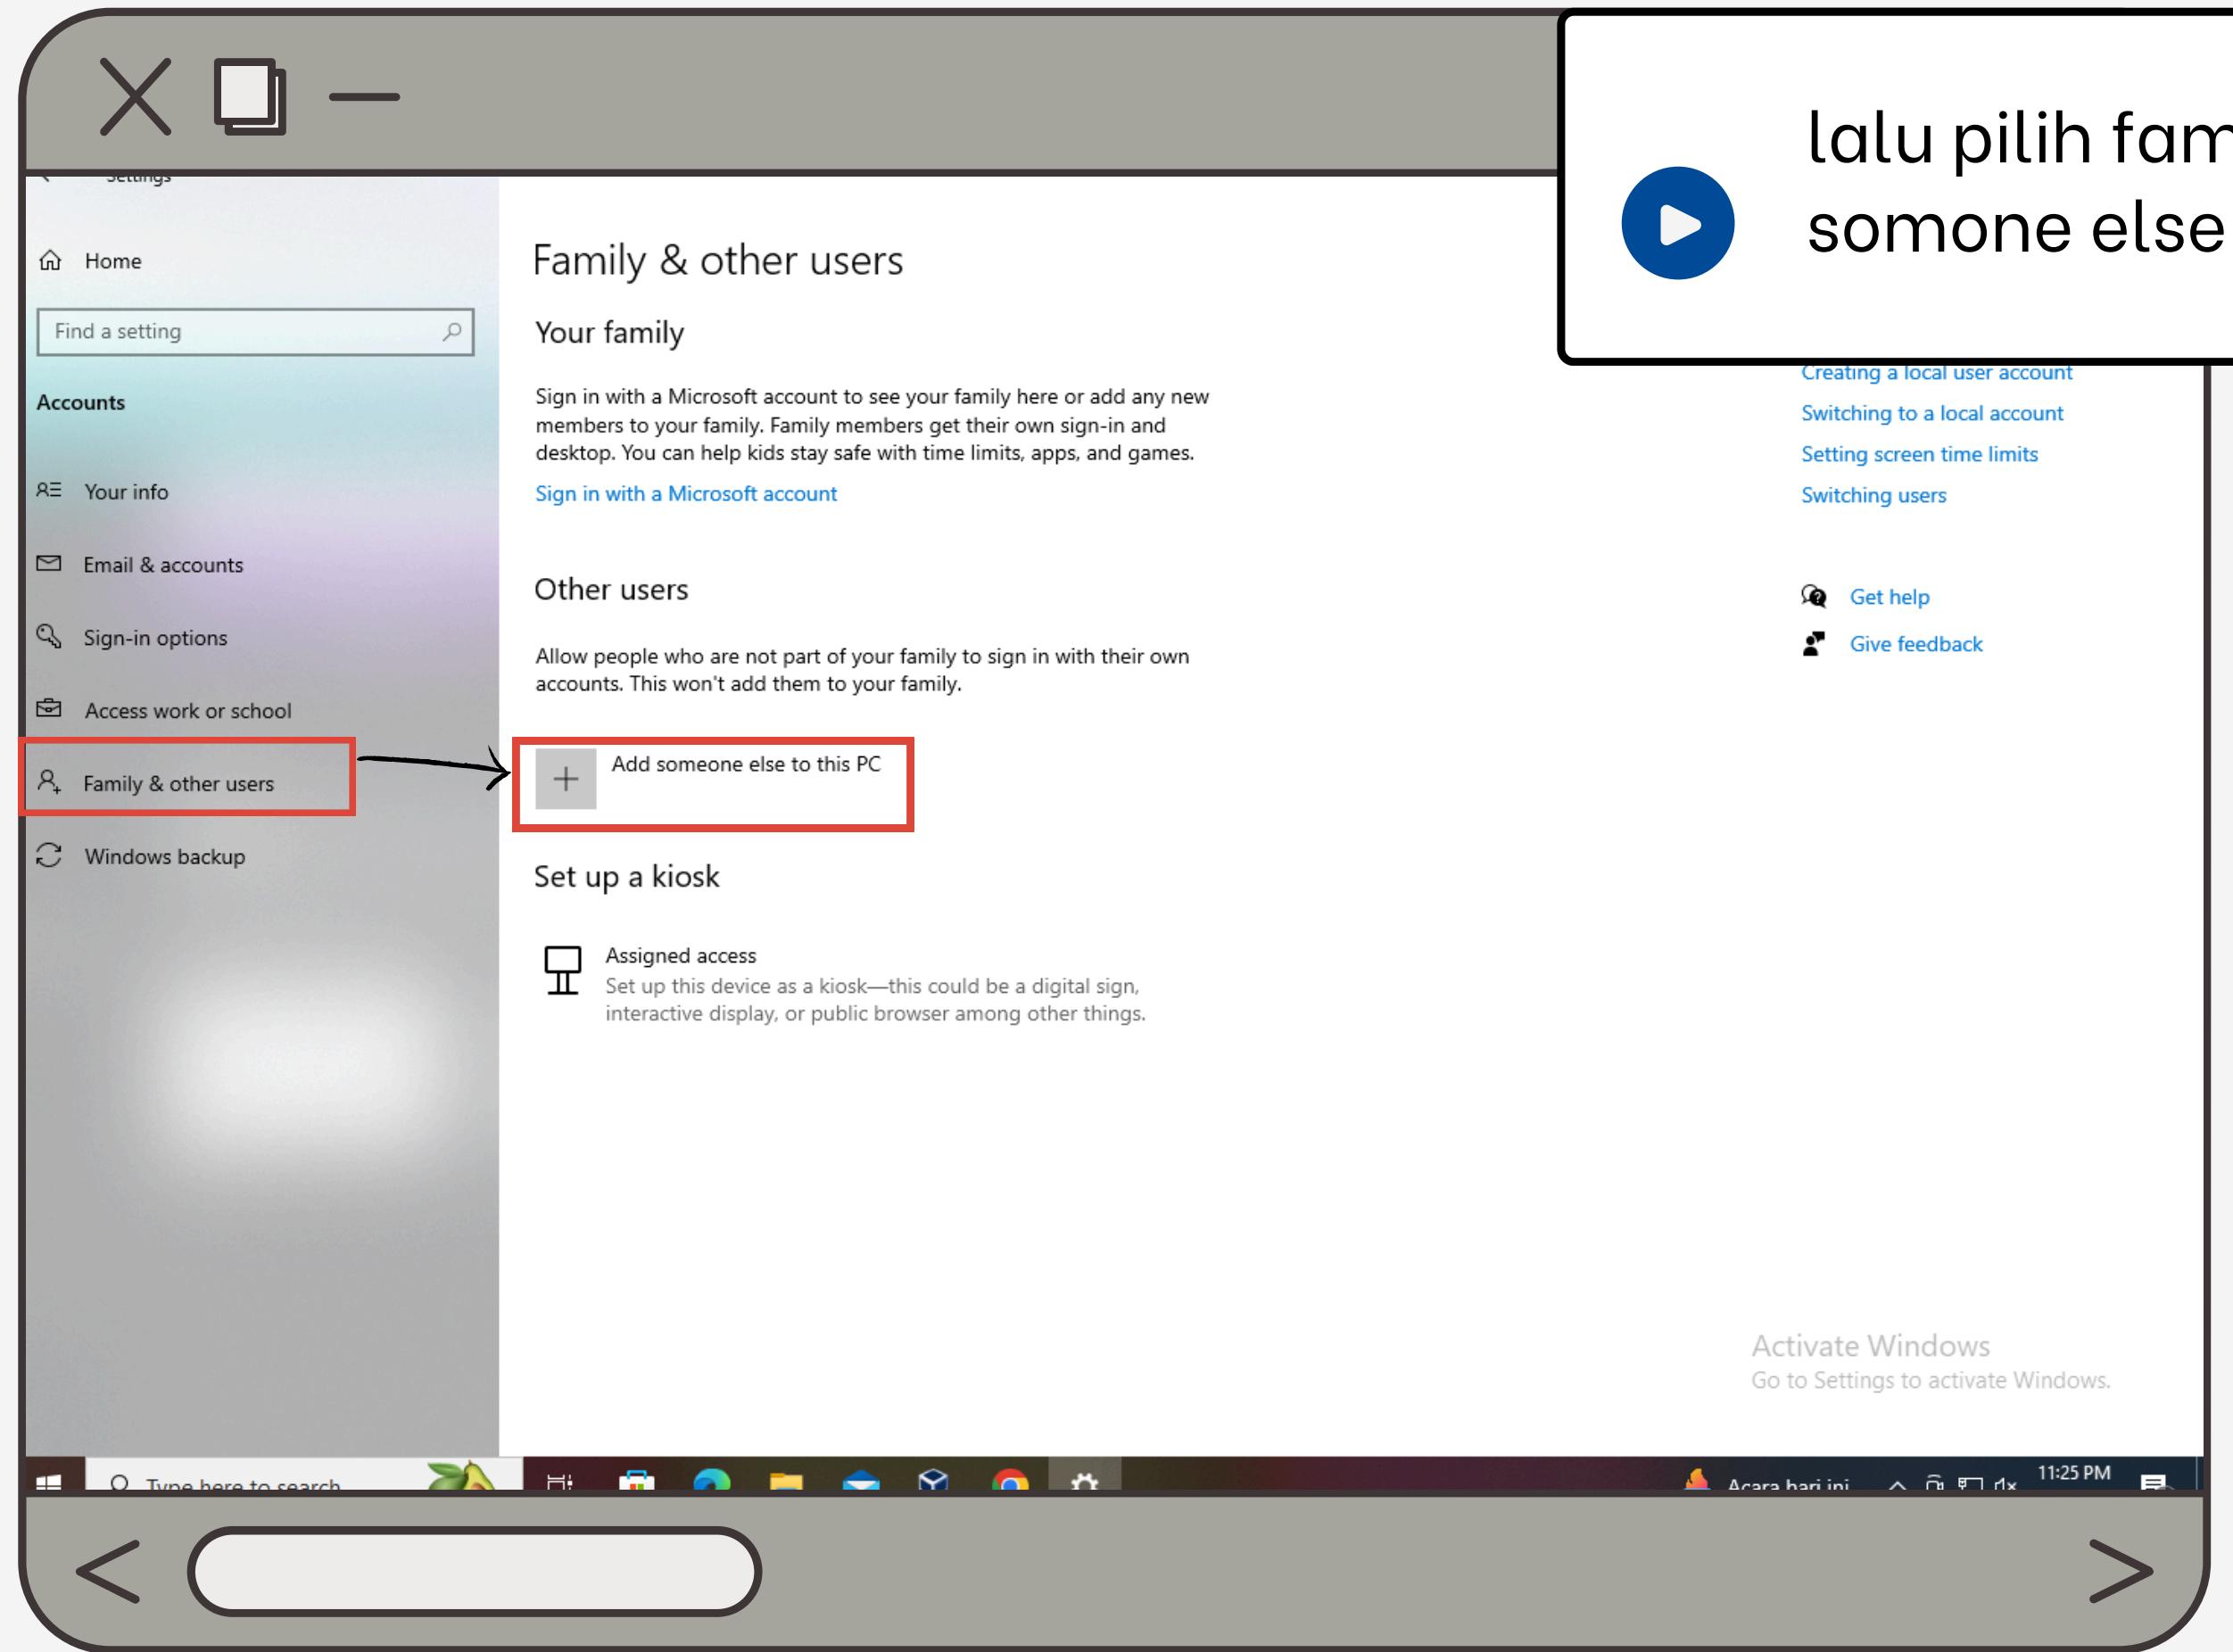

lalu pilih account

The screenshot shows the Windows Settings application window. At the top left is a user profile picture for "LAB TKJ-3" (Local Account) with a "Sign In" button. A "Get even more out of Windows" banner with "Let's go!" and "Skip for now" buttons is present. Below is a search bar labeled "Find a setting". The main area contains several tiles:

- System: Display, sound, notifications, power
- Devices: Bluetooth, printers, mouse
- Mobile devices: Link your Android, iPhone
- Network & Internet: Wi-Fi, airplane mode, VPN
- Personalization: Background, lock screen, colors
- Apps: Uninstall, defaults
- Accounts: Your accounts, email, sync, work, family (this tile is highlighted with a red box)
- Time & Language: Speech, region, date
- Gaming: Game Bar, captures, Game Mode
- Ease of Access: Narrator, magnifier, high contrast
- Search: Find my files, permissions
- Privacy: Location, camera, microphone
- Update & Security: Windows Update, recovery, backup

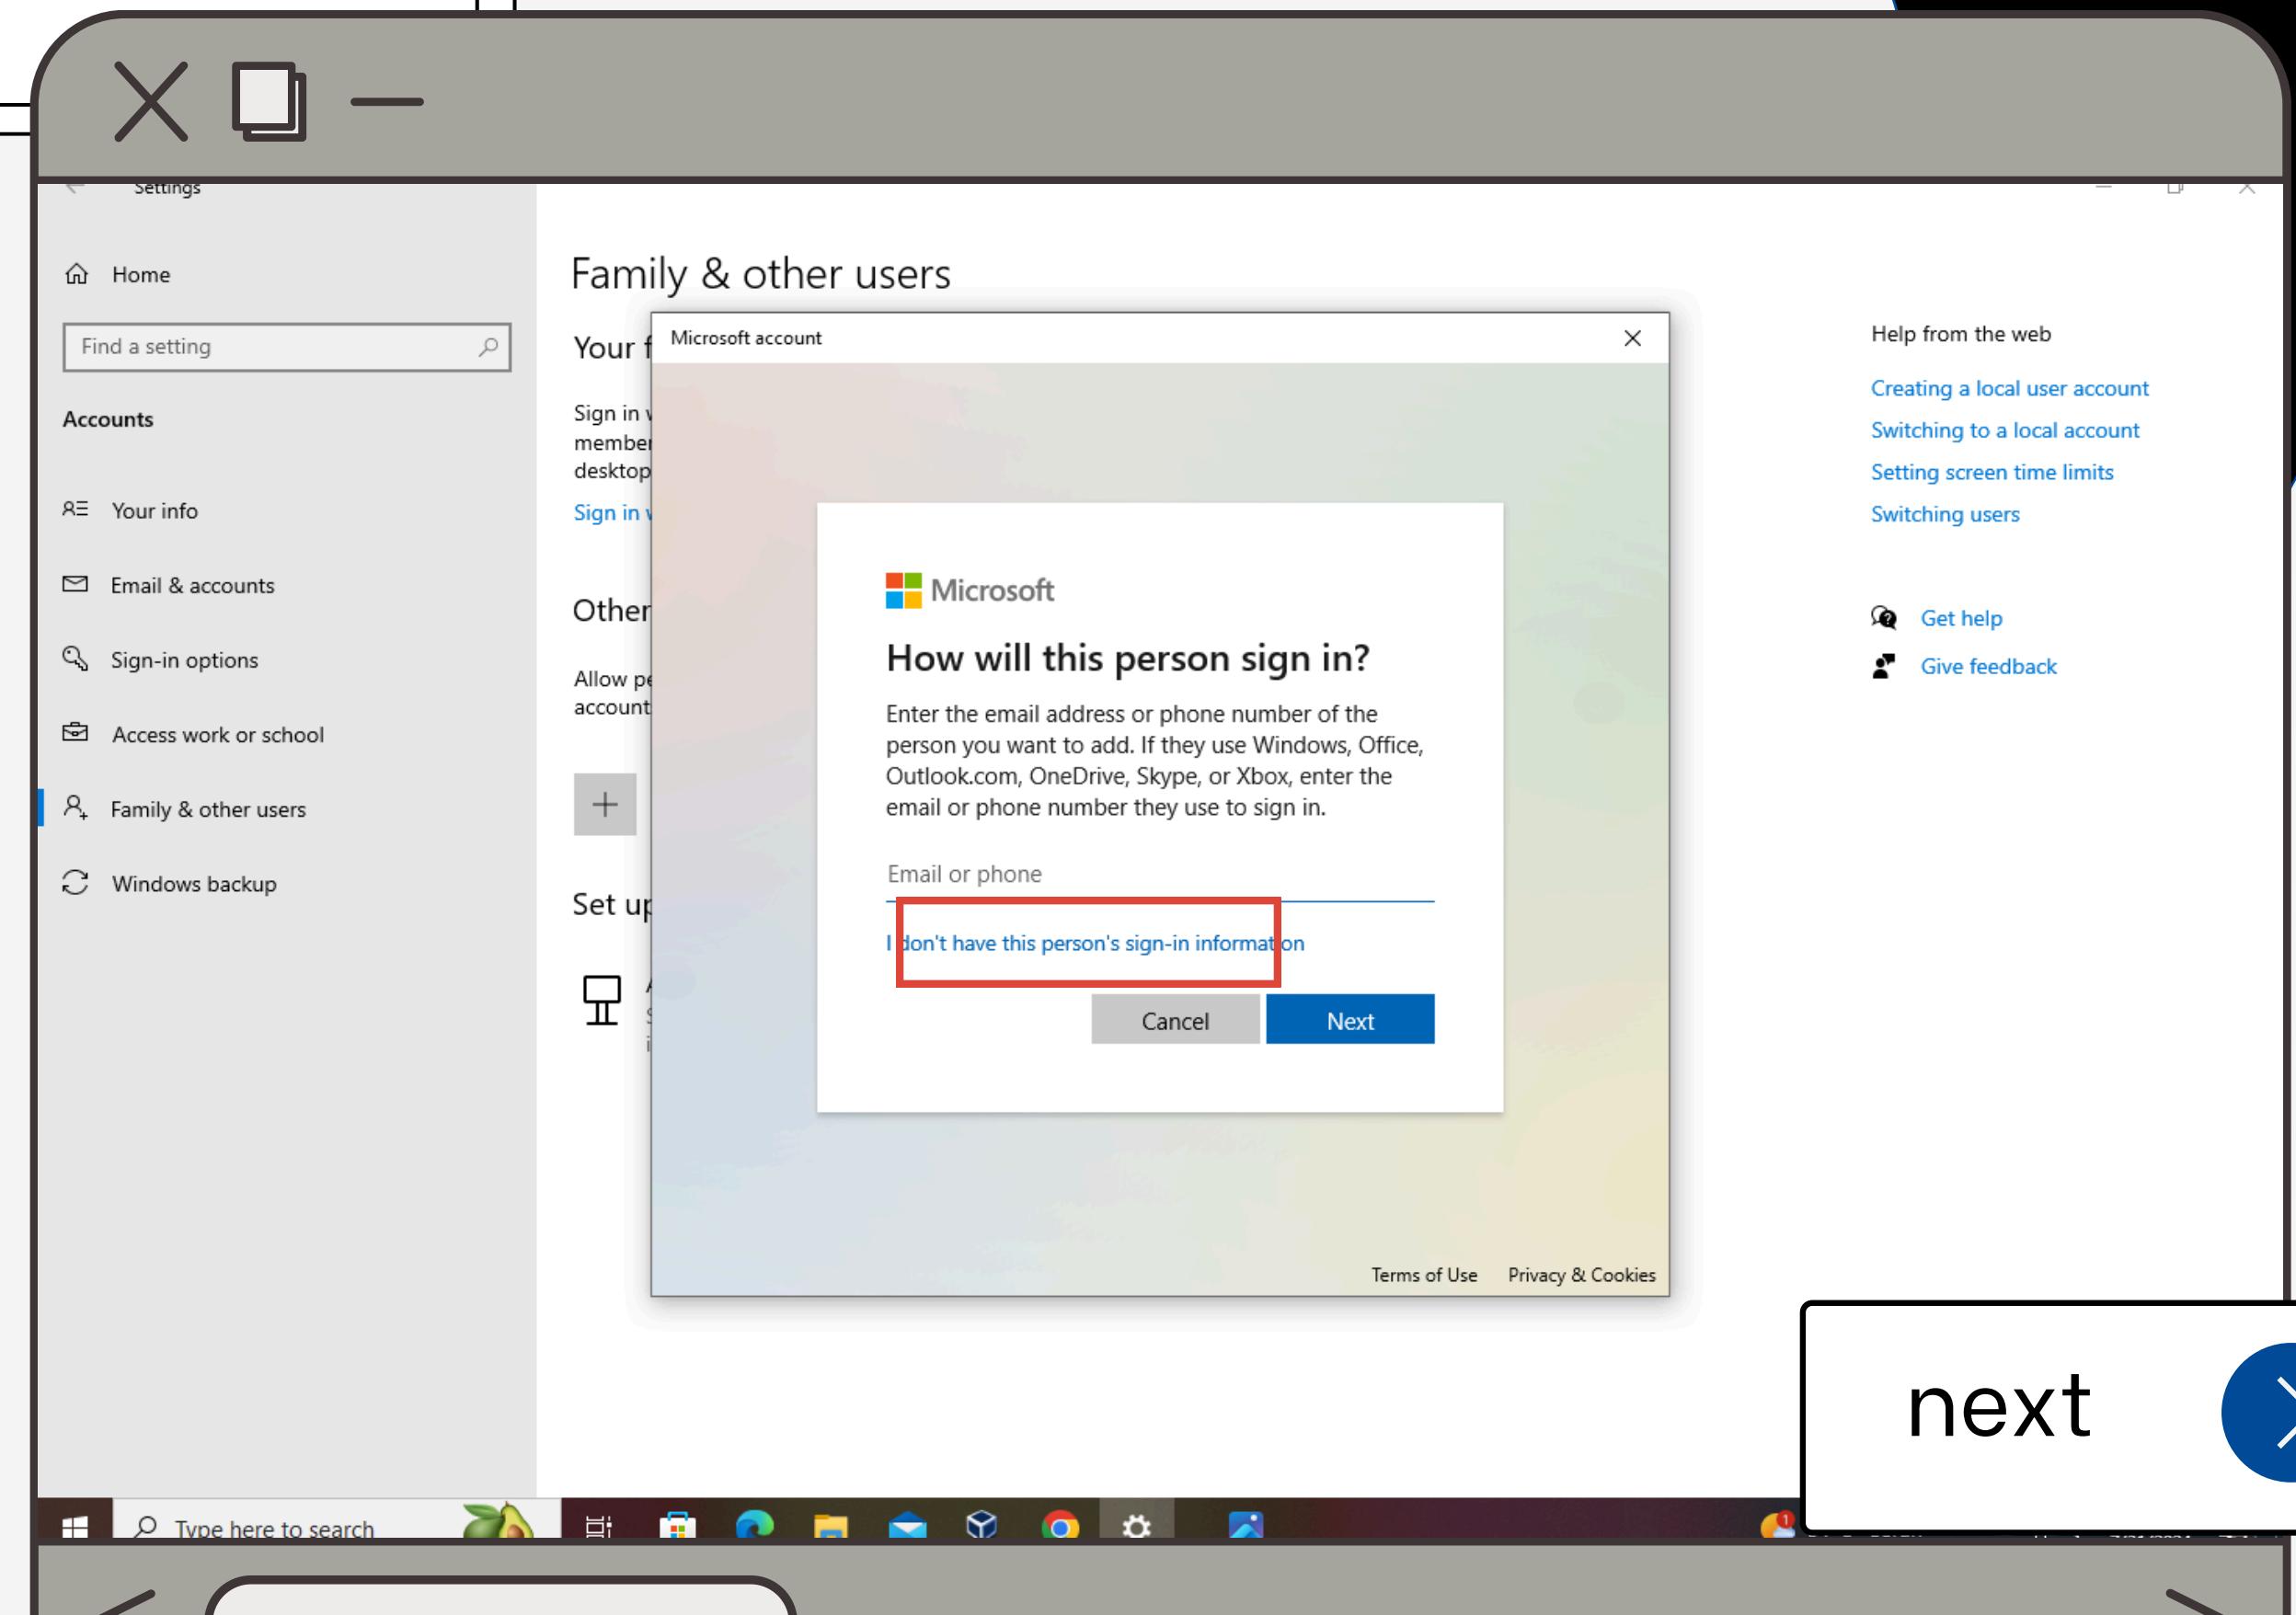

At the bottom, there is a message: "Windows isn't activated. Activate Windows now." and an "Activate Windows" button with the sub-instruction "Go to Settings to activate Windows.". The taskbar at the bottom shows the Start button, a search bar, and various pinned icons.

lalu pilih family & other dan pilih add somone else to this pc

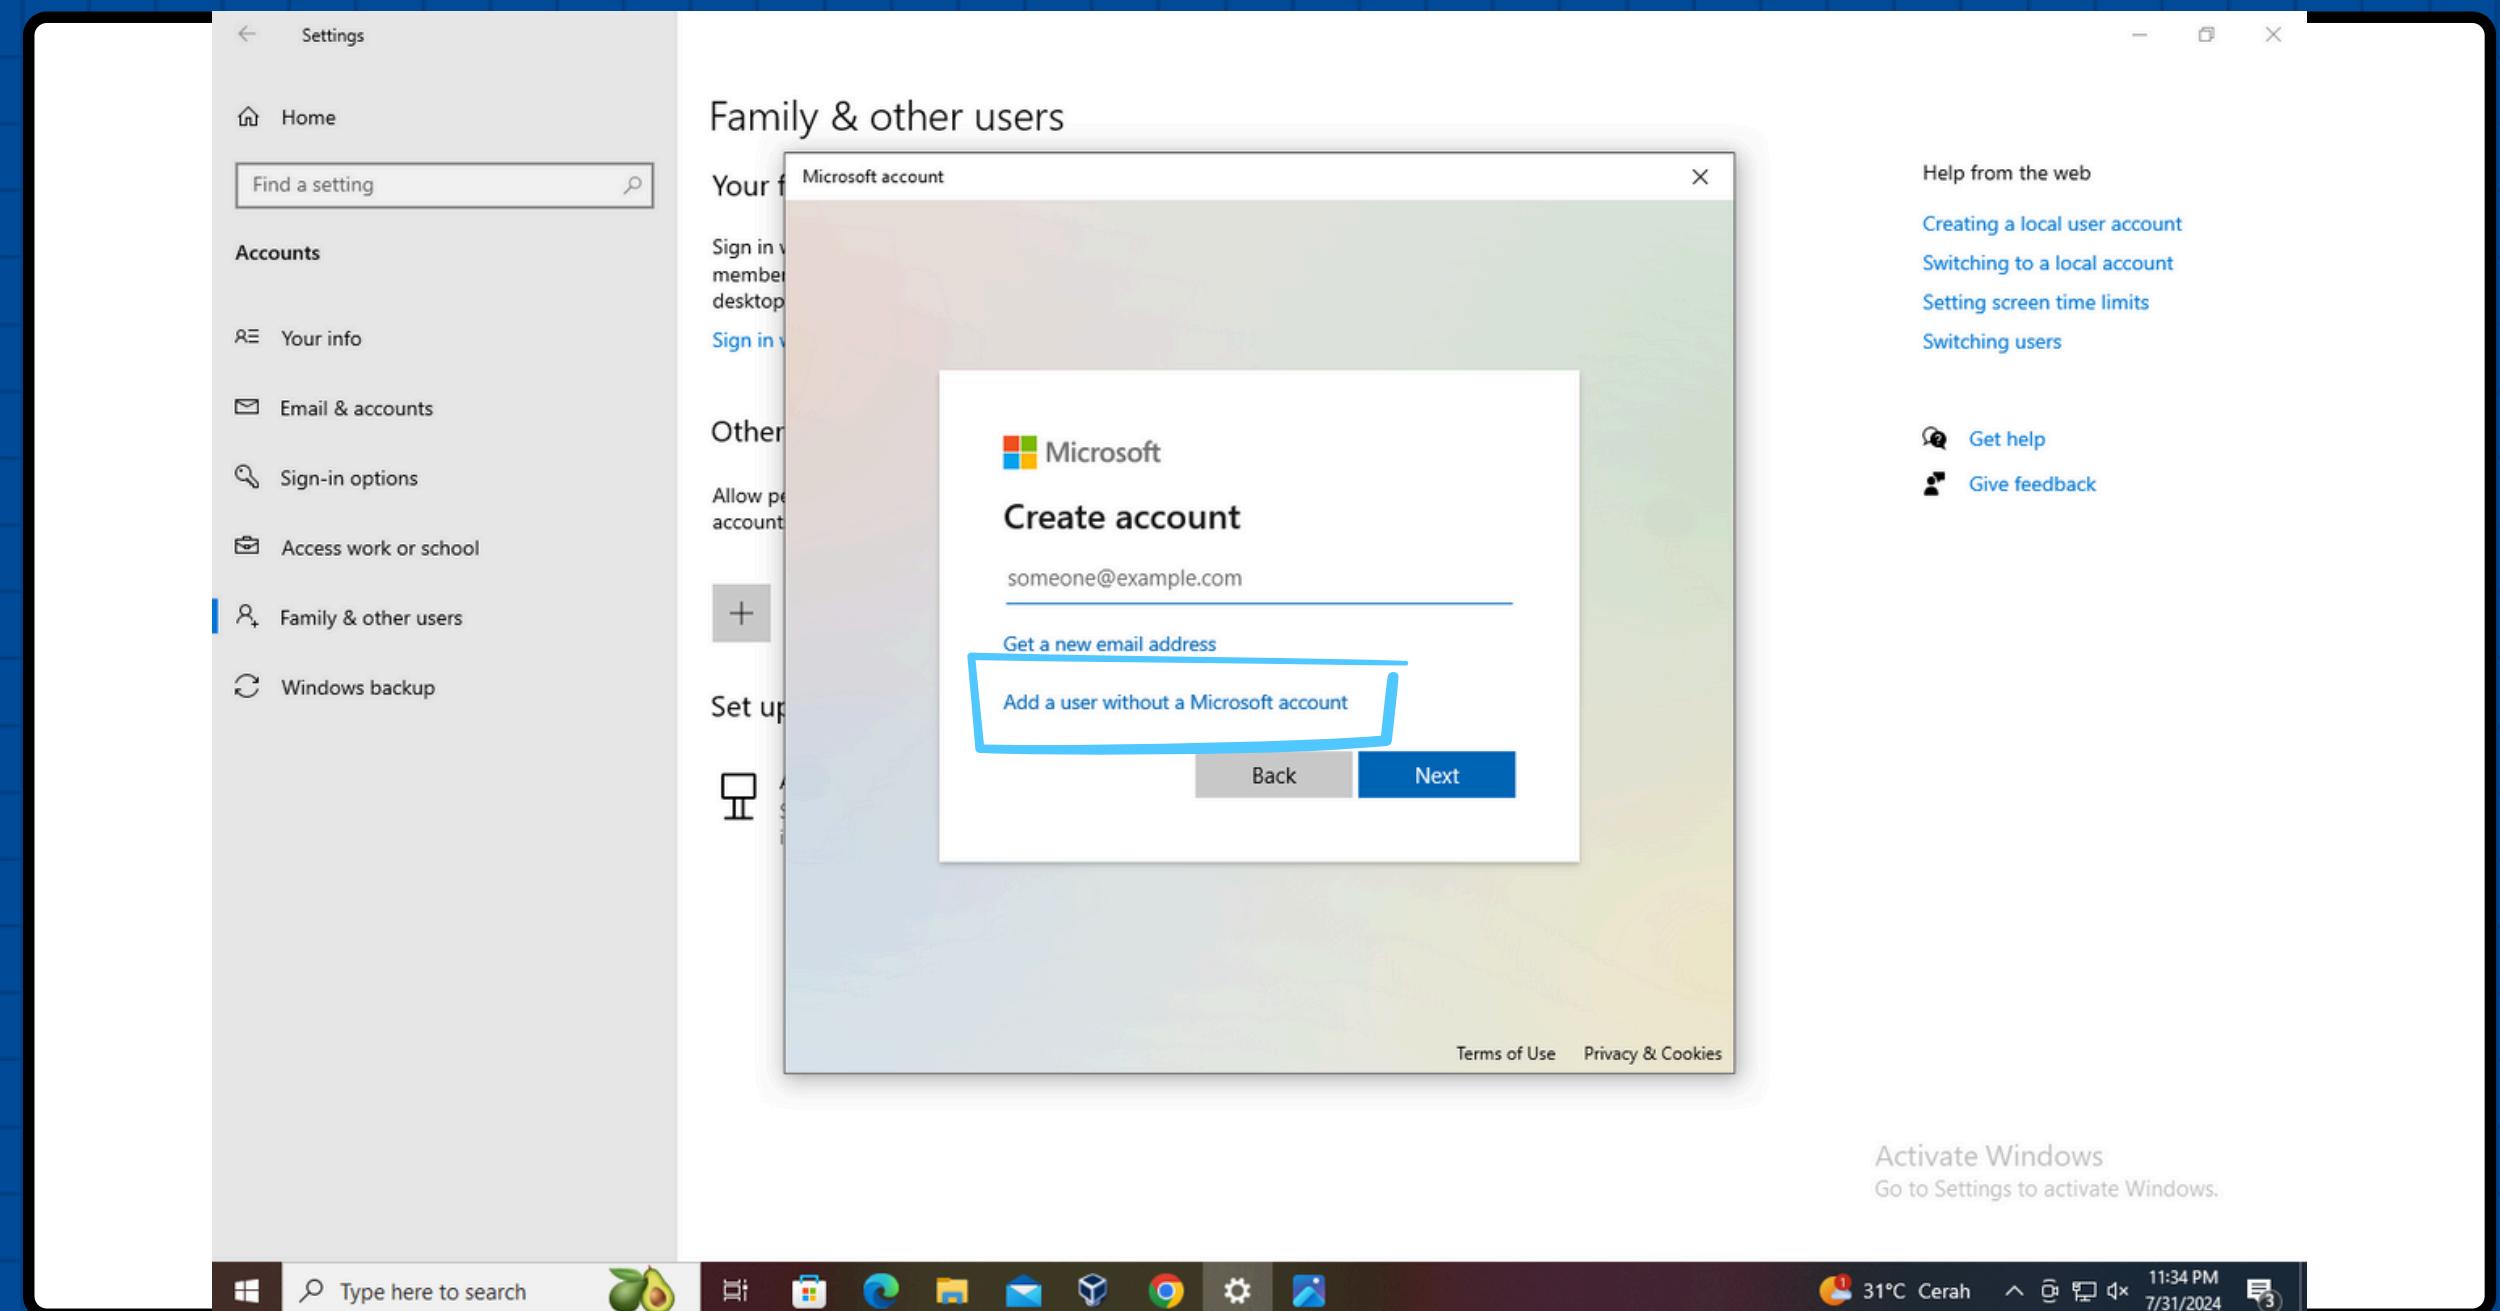

ooo

pilih i don't have
this person sign in
information

pilih add user without microsoft account

sekarang buat admin ke, ikuti cara yang sama tapi isi data data admin yang ke 2

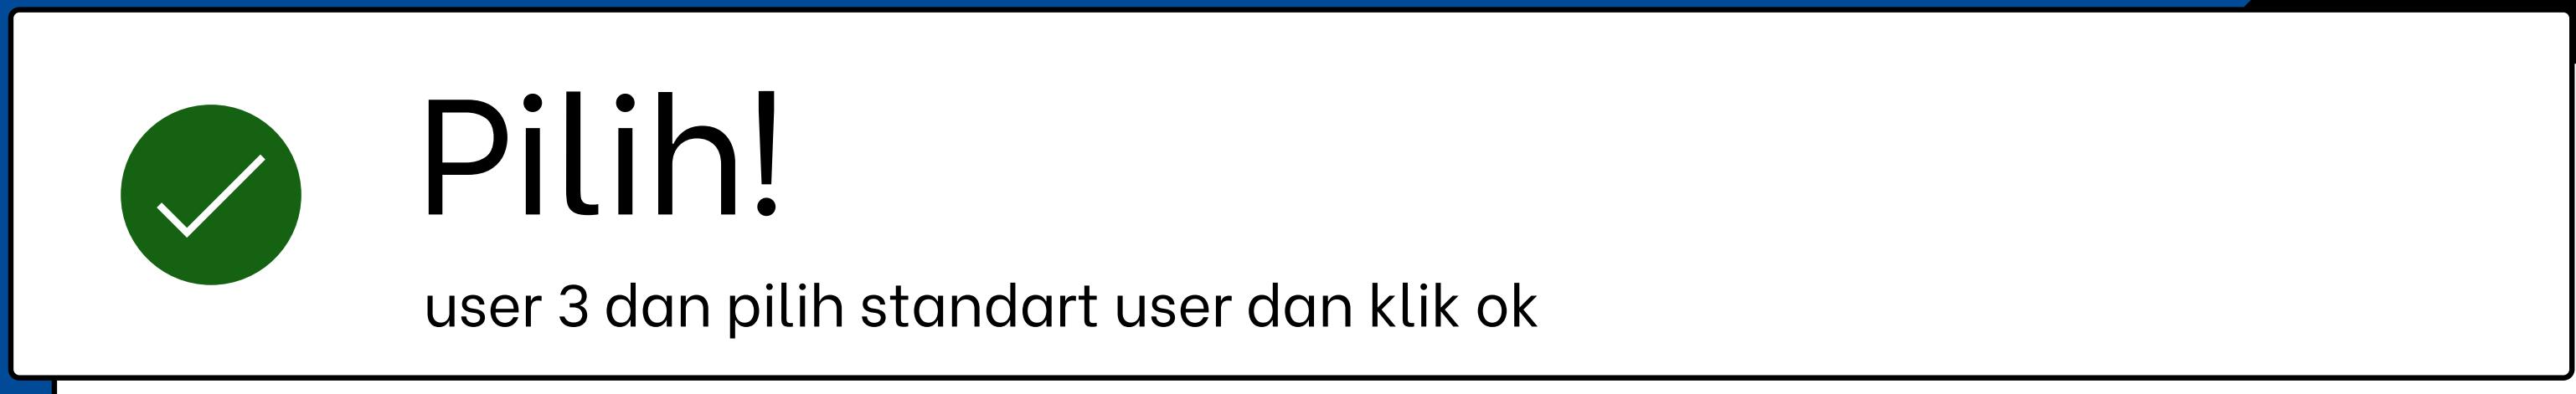

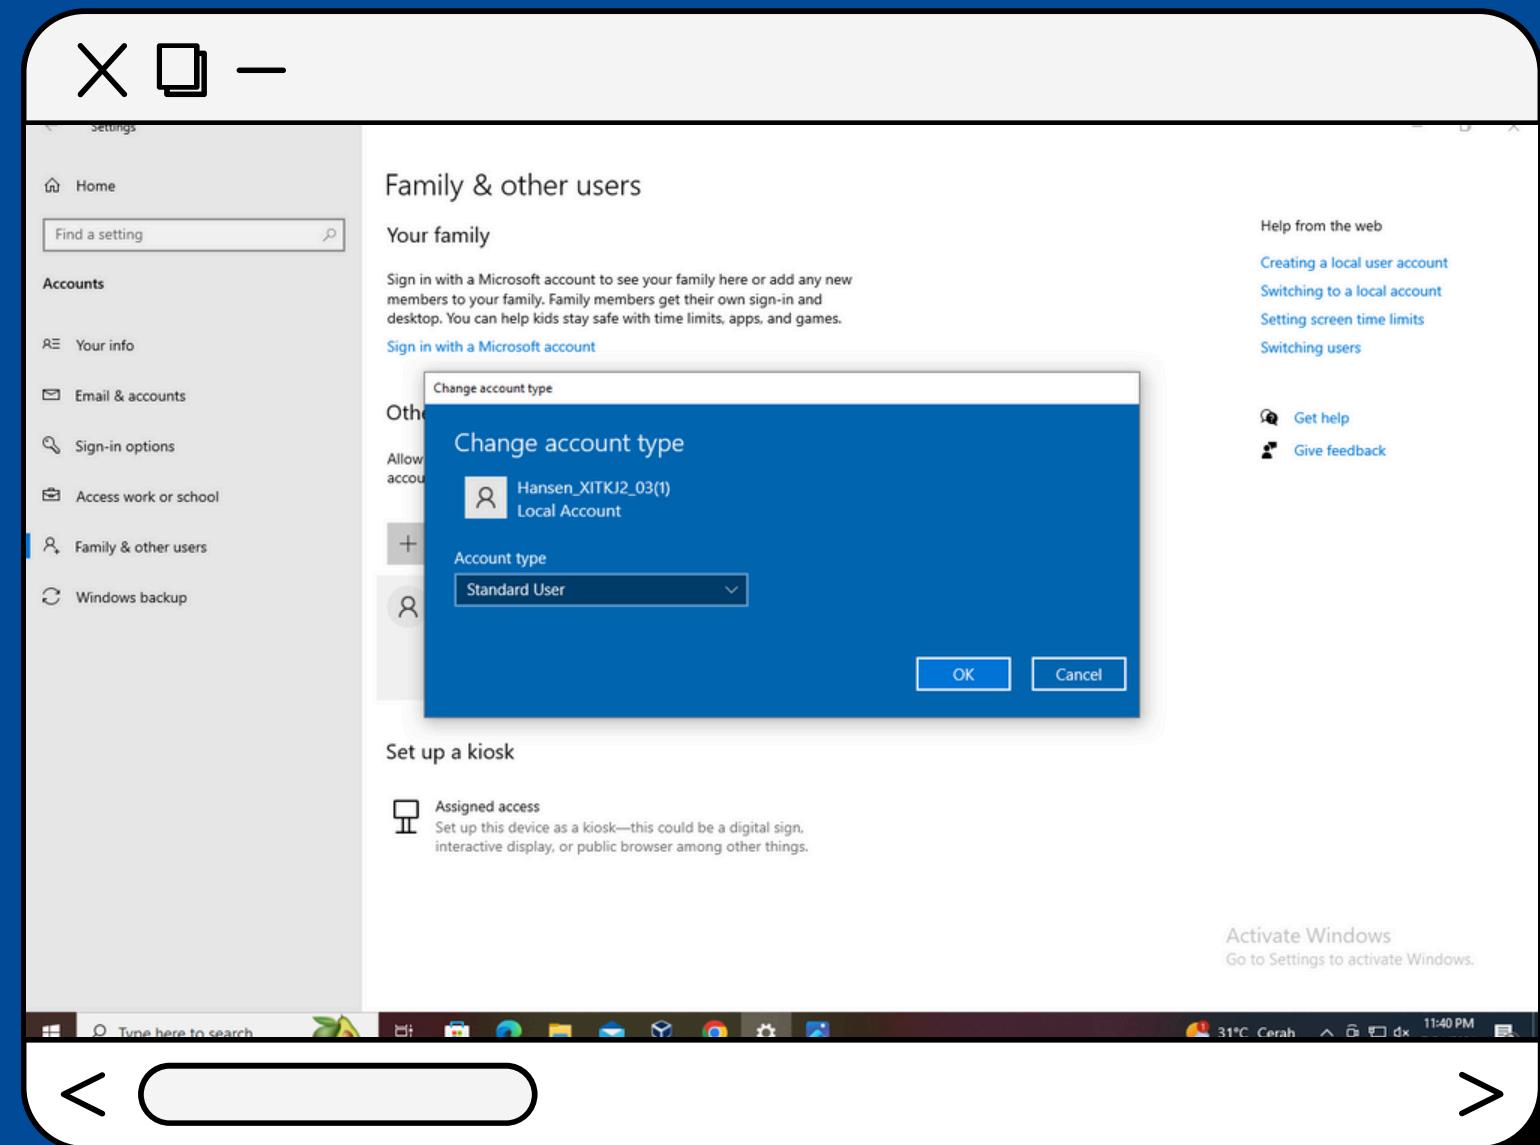

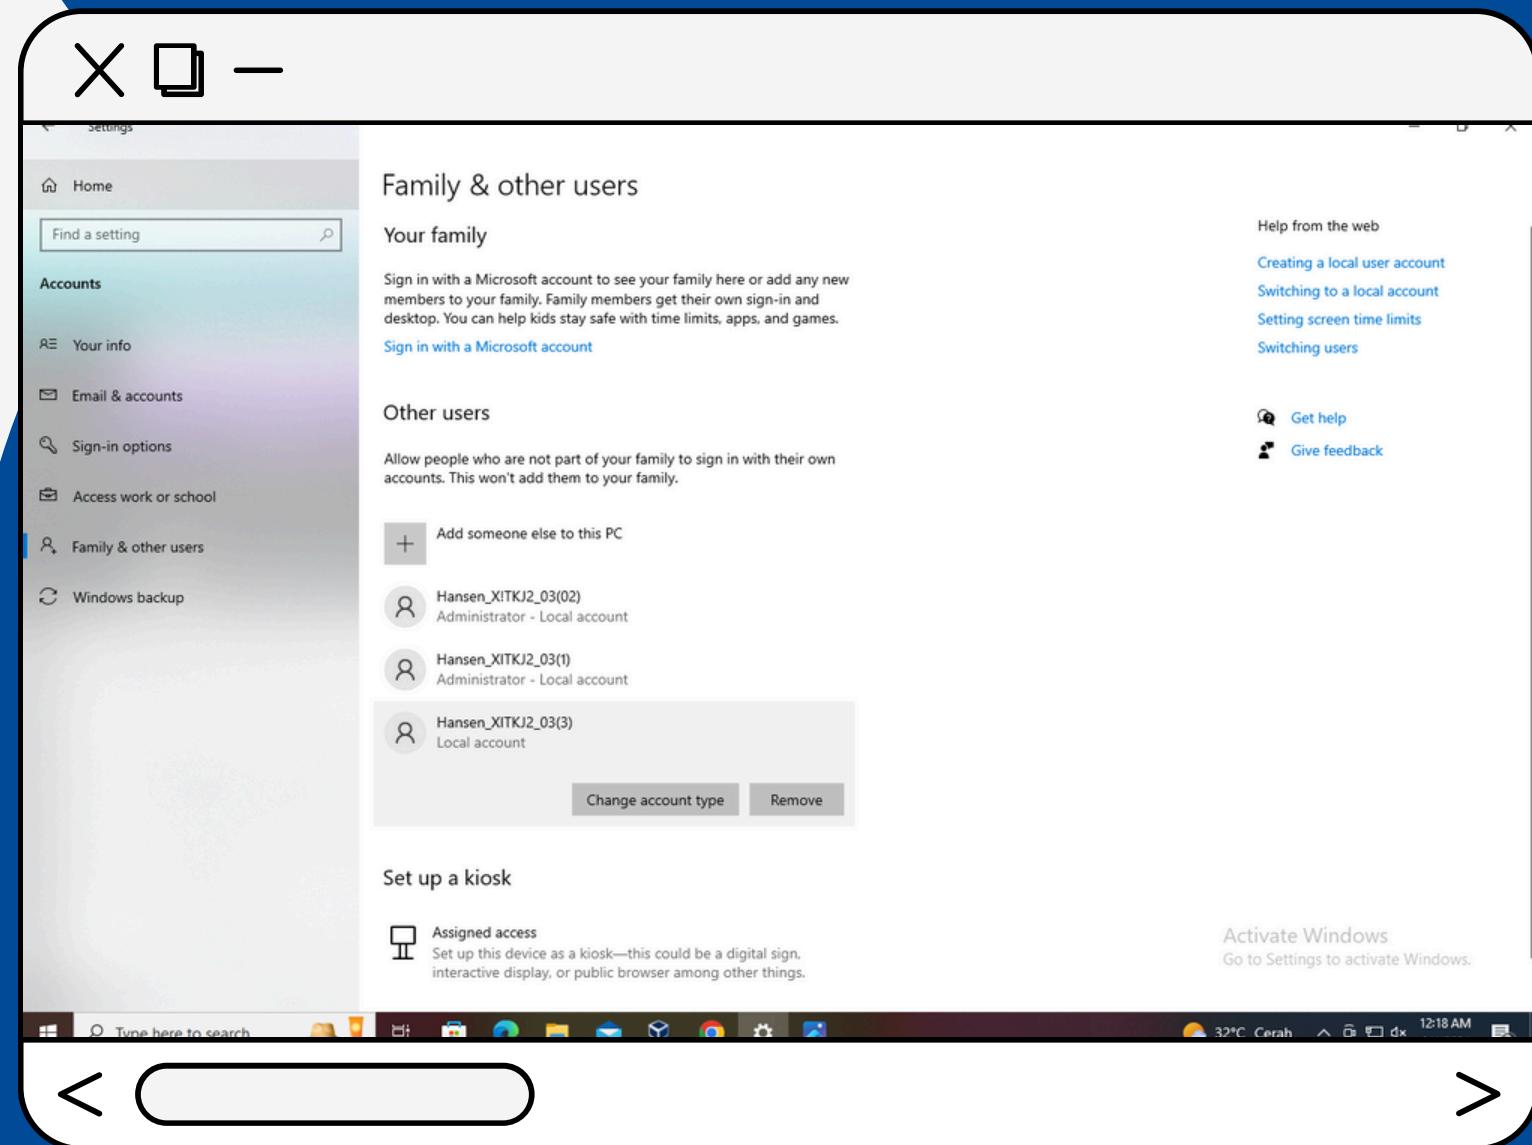

lalu step selanjunya sama dengan admin 1

sekarang bikin user standart

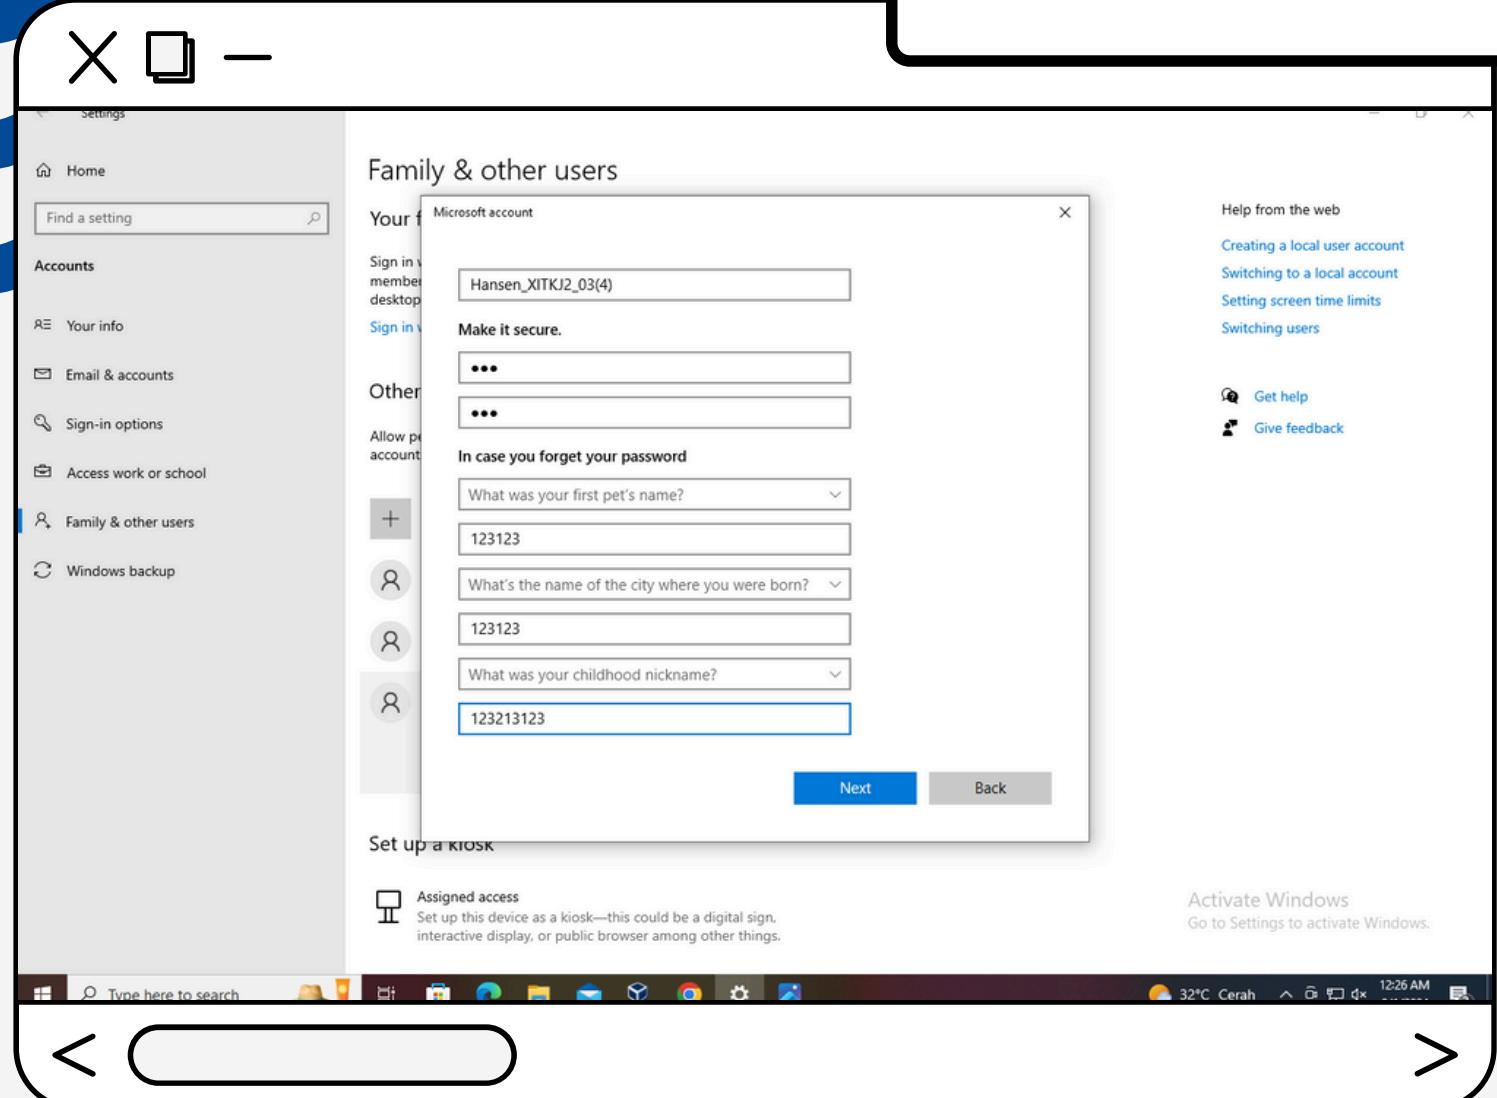

step sama
tapi data di
isi dengan
user 3

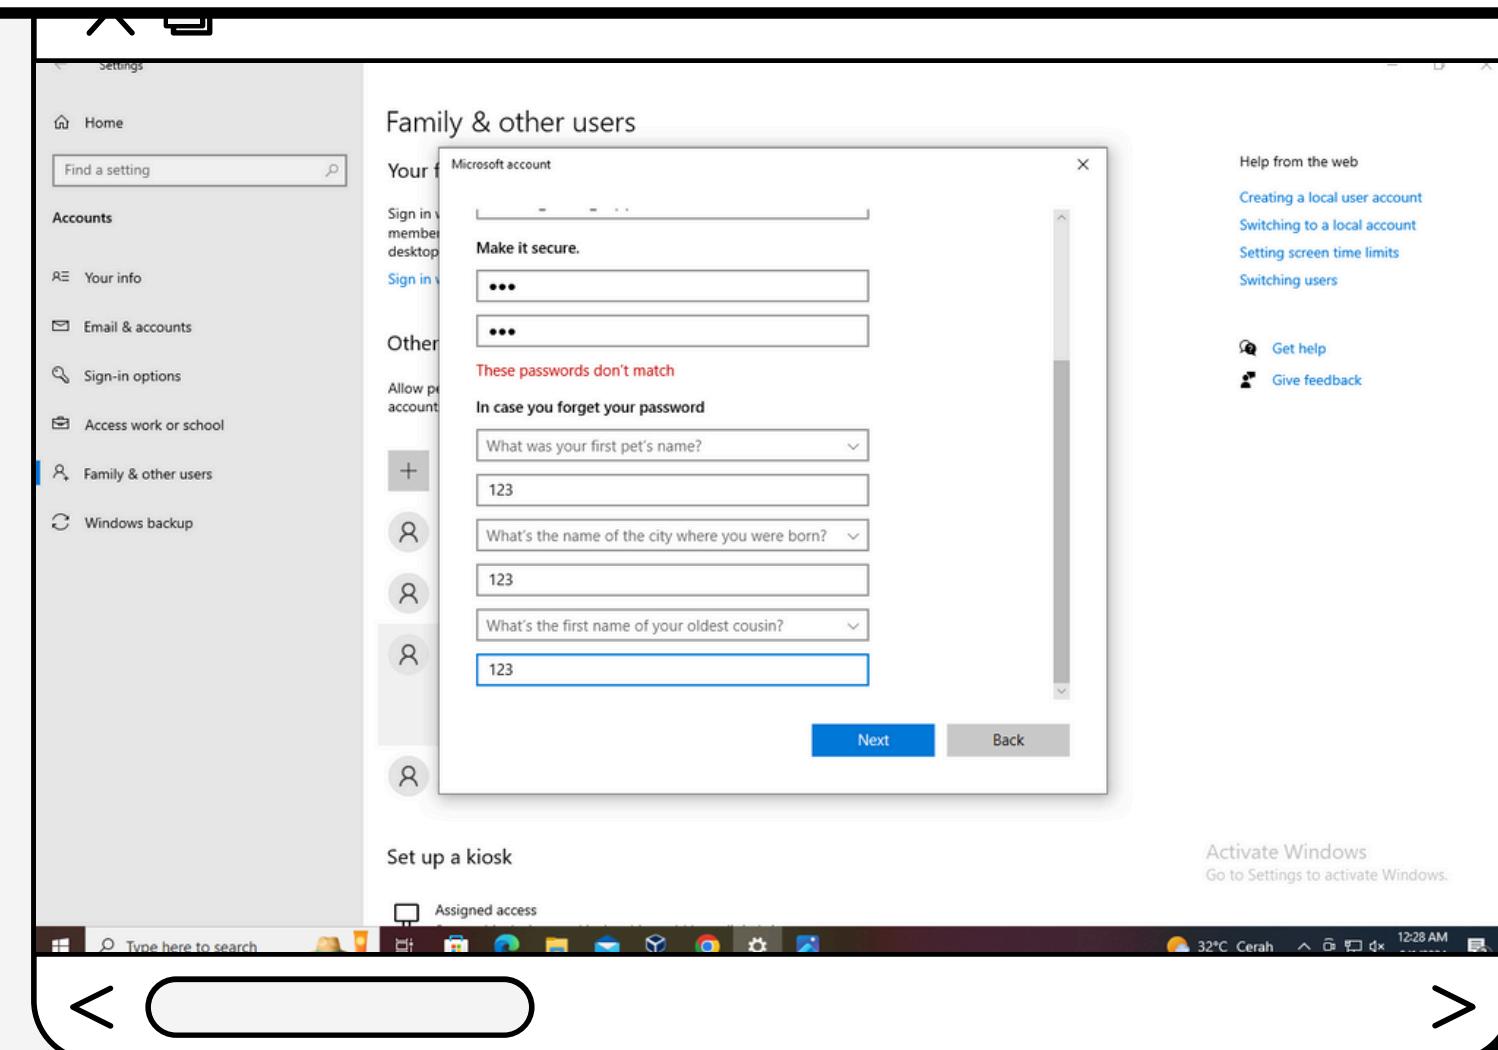

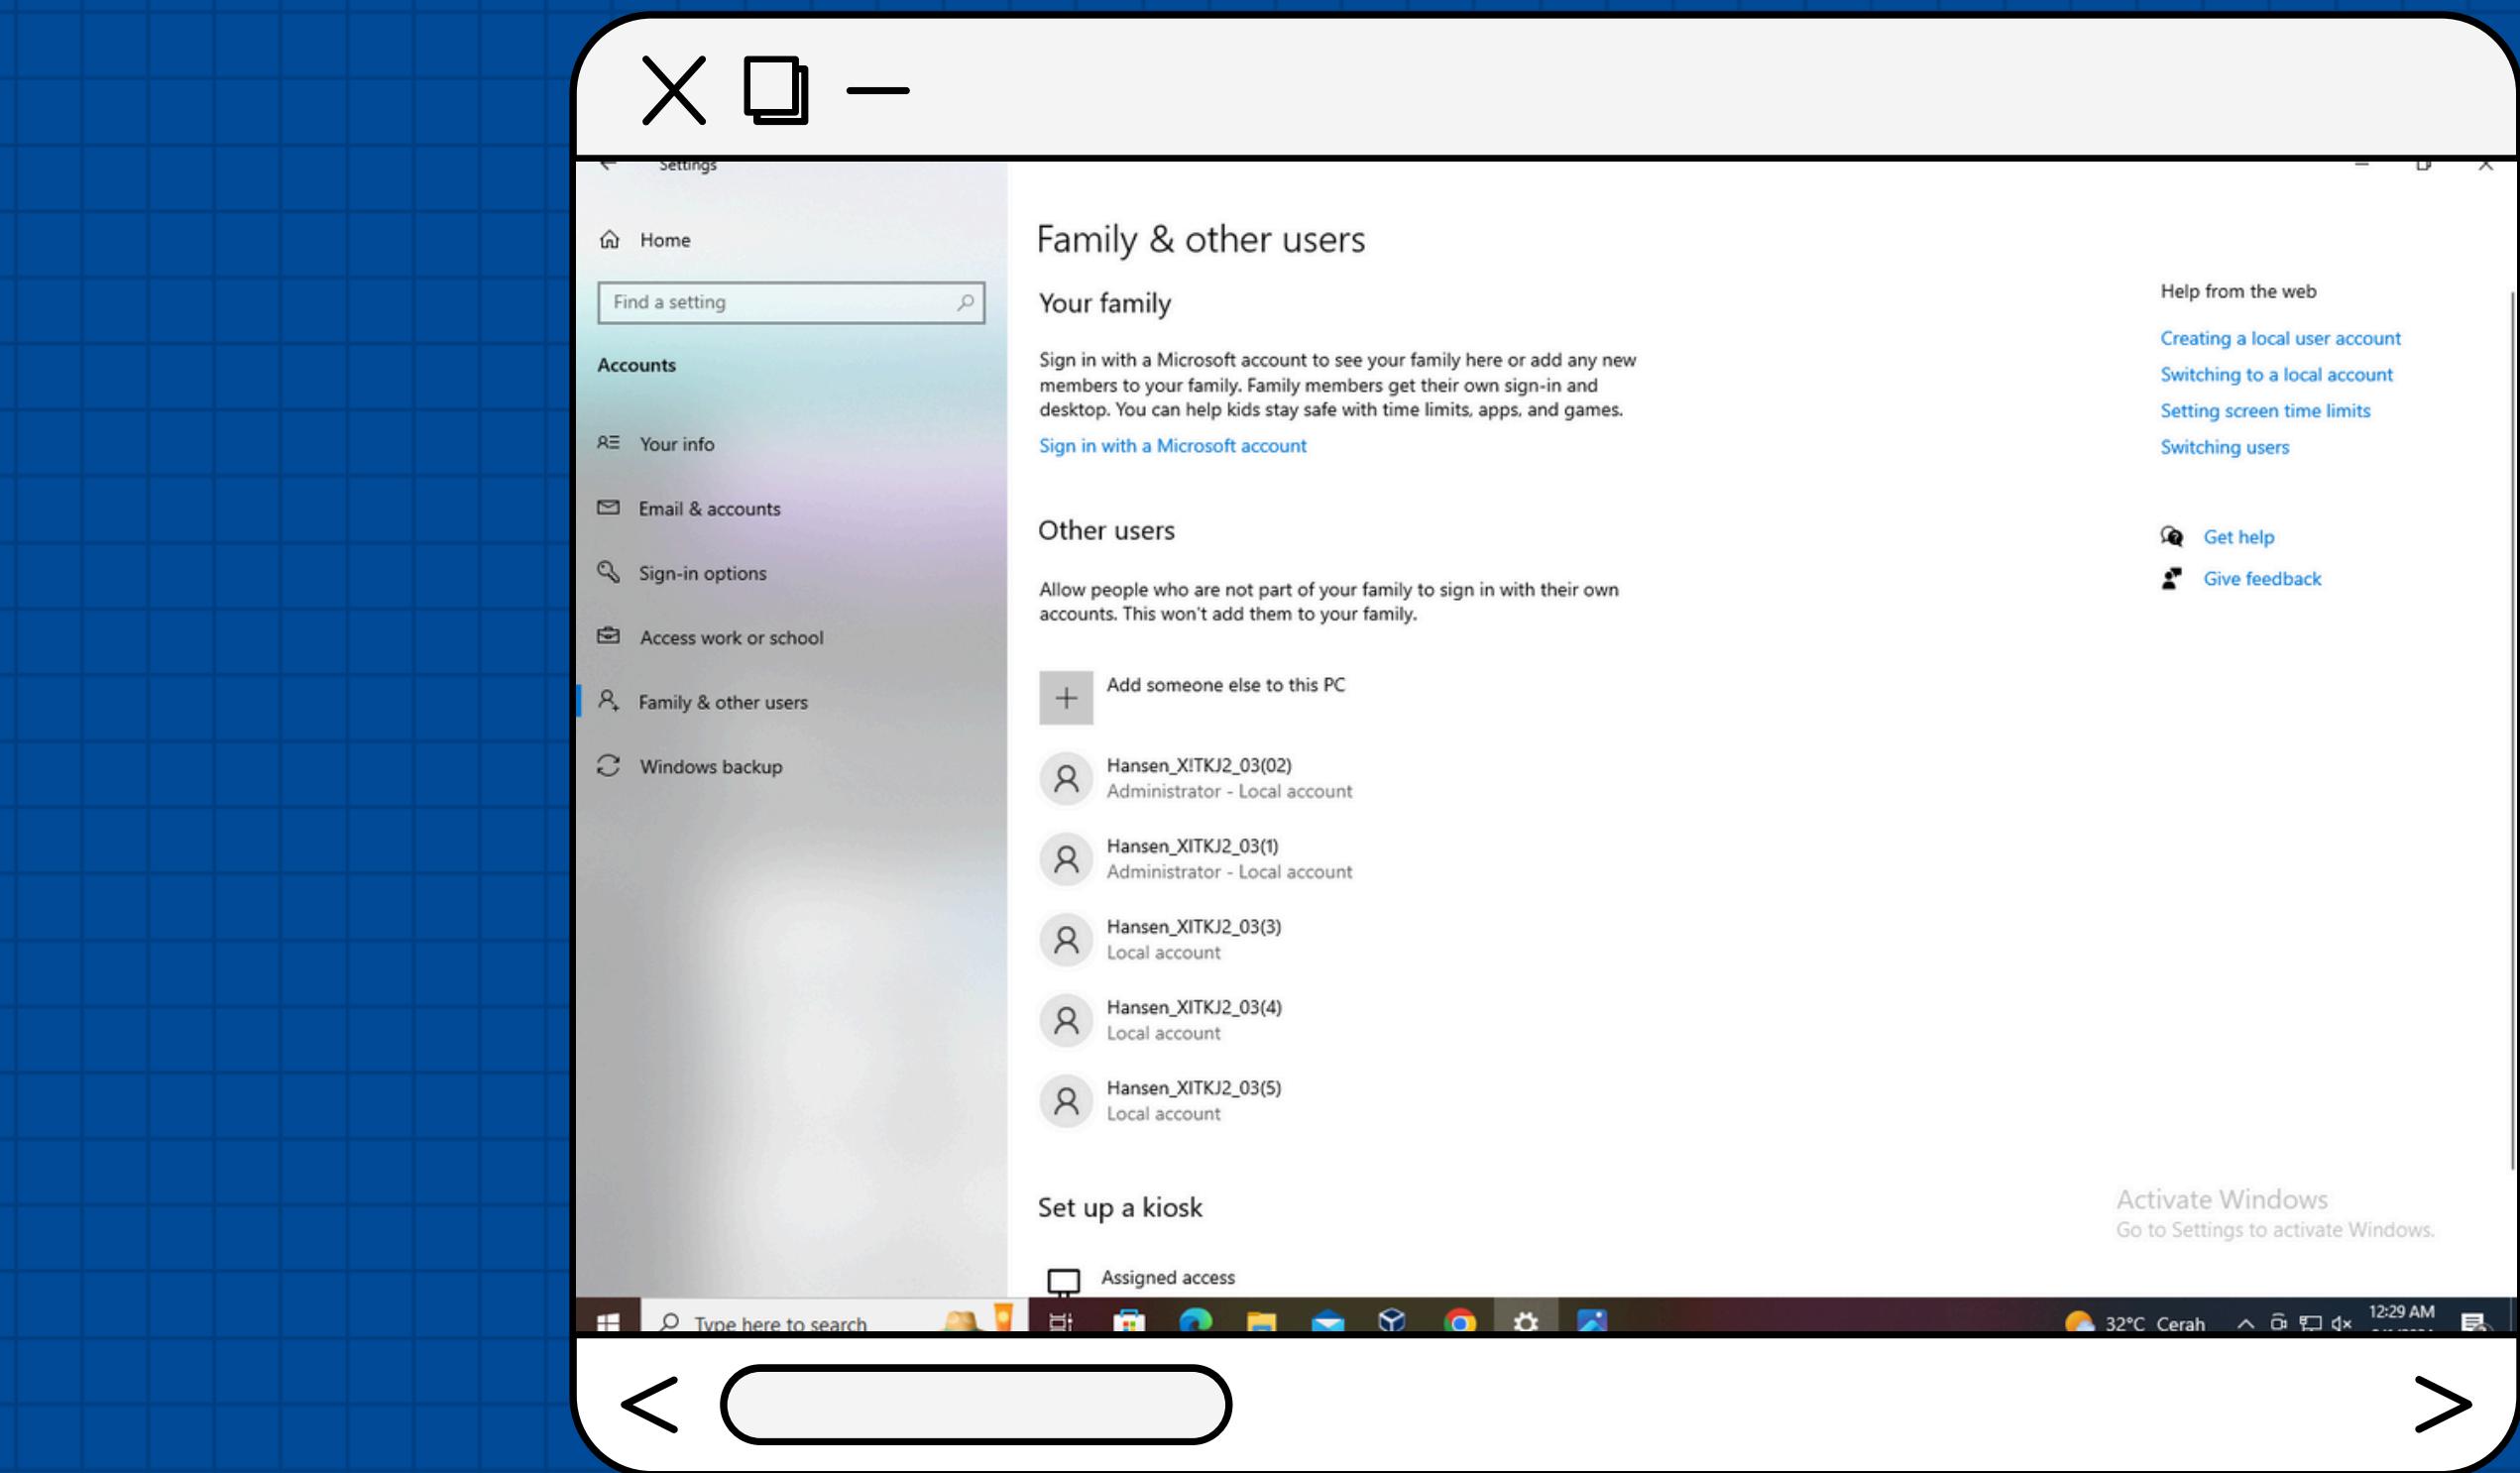

user 4 dan 5

**step sama hanya data yang di ubah
dengan user 4 dan 5**

vs.

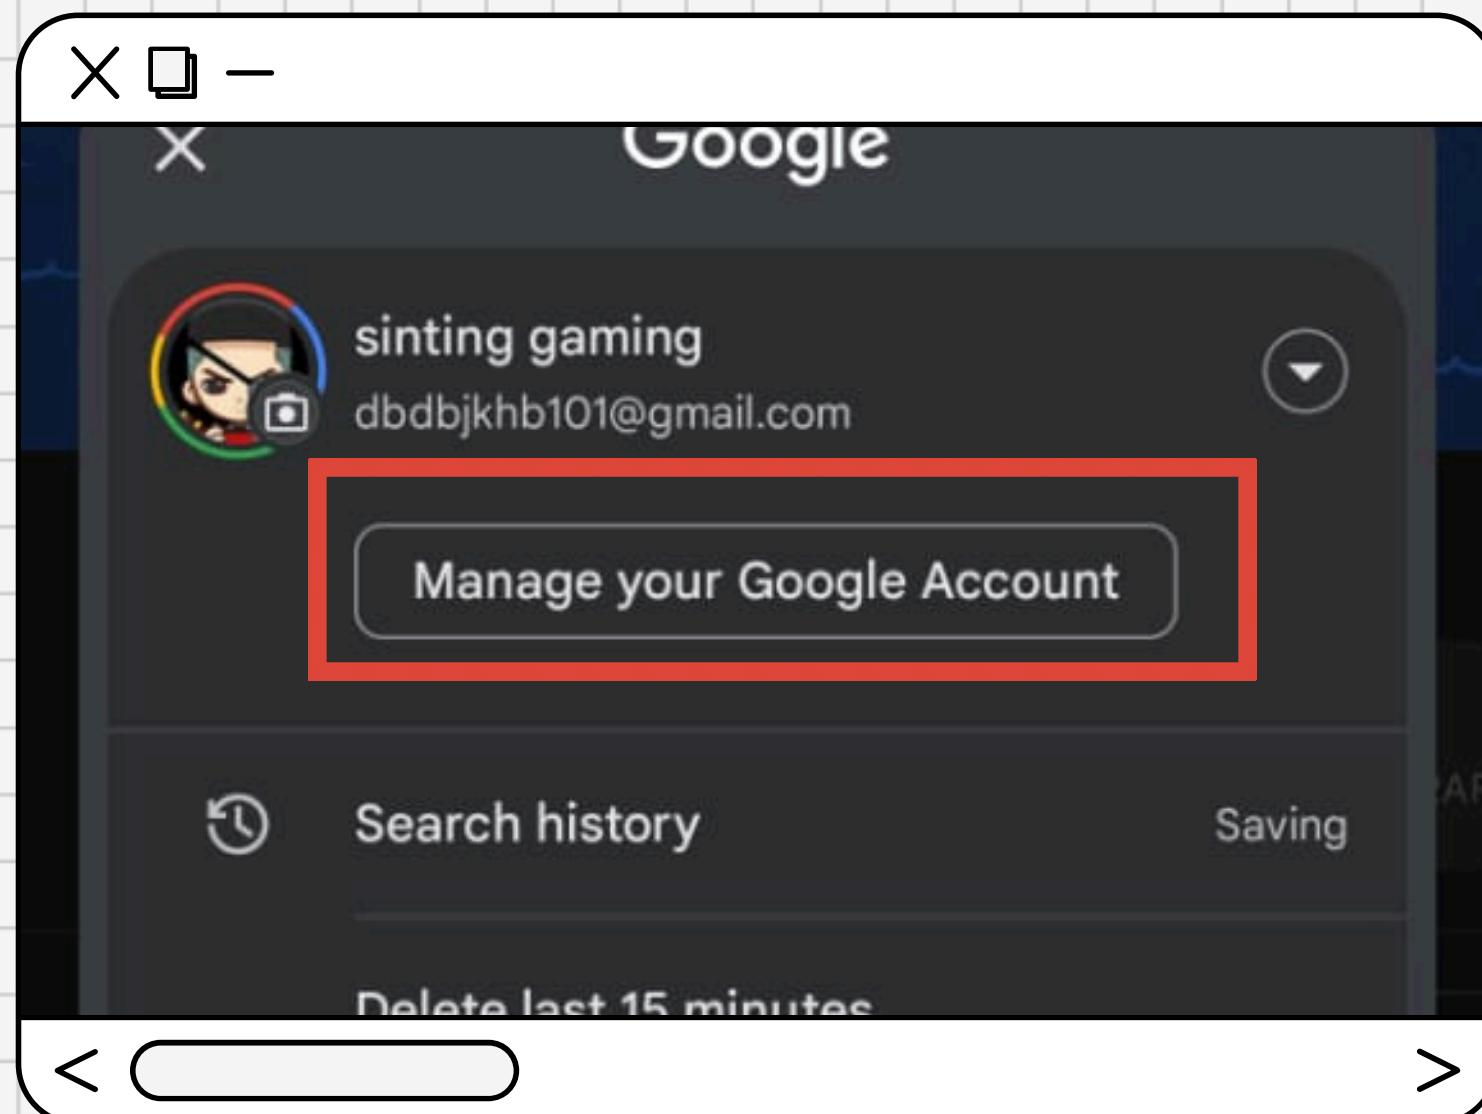

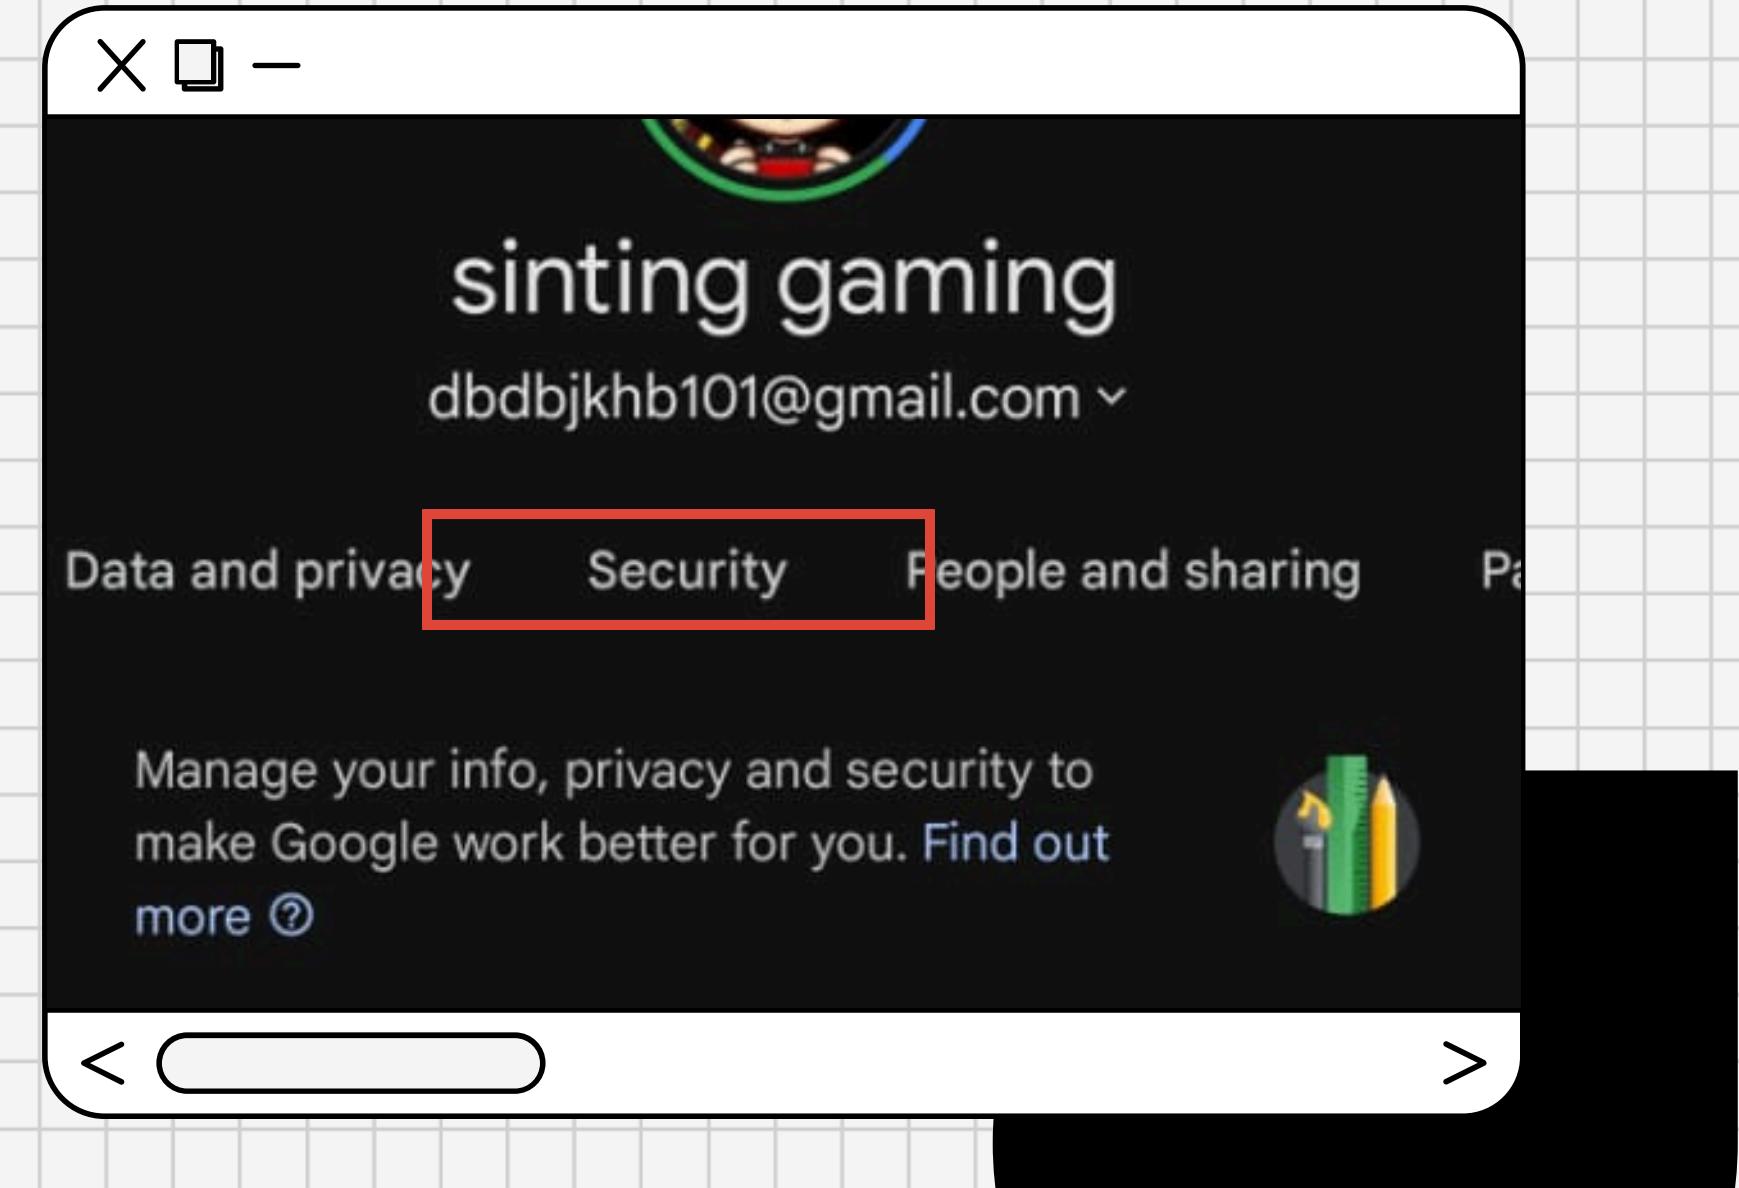

hasil ahkir

02

2FA Google account

vs.

masuk ke manage your google account terus ke bagian security
